SUBJECT INDEX

A

Acromegaly
- Calcium Absorption 136
- Retention of Oral ^{47}Calcium 136

ACTH
- Concentration in Plasma Following electric shock therapy 5
- - Following Histalog administration 5
- - Following insulin-induced hypoglycemia 4
- - Following surgical stress 6
- - Following Vasopressin administration 6
- 17-Ketosteroid- and Hydroxyproline Excretion in Urine after ACTH-Administration 147
- Stimulation of Lipolysis by 279

Actinomycin D
- A Potent Inhibitor of DNA 65
- Reversal of Chronic Growth Hormone Effect by 65

Adipose Tissue
- In Vitro Transformation of Cortisol by (man) 95
- Effect of „Glucagon-Like Immunoreactive Material" on Metabolism 143
- Effects of Hypophysectomy and Growth Hormone on 290
- Enzyme Pattern 232
- Hexosemonophosphat-Shunt in 232
- LDH Activity in 232
- Role of 3', 5'-Cyclic AMP Phosphodiesterase in Insulin Action on 93
- Soluble Proteins in 232

Adrenal Cortex
- Effect of Adrenal Steroids in Gluconeogenesis 178

Adrenal Gland
- Pregnancy in Ectopic Adrenal Carcinoma 149

Aminophylline
- Inhibitor of Adenosine-3', 5'-Monophosphat Diesterase 162

Antidiuretic Hormone
- Neurotropic Stress and Release of ACTH and ADH 214
- Release under Neurotropic Stress 215
- Release under Systemic Stress 214
- Systemic Stress and Release of ACTH and ADH 214

B

Blood Pressure
- Increases in after Administration of γ-Guanidinobutyramide 263

C

Calcitonin
- Secretion of after Stimulation by Hypercalcemia 39

Calcium
- Analyzing Small Amounts of ^{47}Ca by a Whole Body Counter 137
- Absorption in Acromegaly 136
- ^{45}Ca Uptake by Islets of Langerhans after Administration of Epinephrine 319
- Retention of Oral ^{47}Calcium in Acromegaly 136
- Stimulation of Calcitonin Secretion by Hypercalcemia 39

Carbohydrate Metabolism
- Enhancement of Glucose Uptake by Growth Hormone 30
- Modification of the Method of Determination of the Glucose Assimilation Coefficient (K) 37

Cartilage
- Stimulation of ^{35}S Incorporation into (chicken) 235

Cholinesterase
- Activity in presumptive islet cells (chicken) 15

Cobalt
- Enhancement of Reactive Insulin Secretion by Cobalt-Chloride 44

Column Chromatography
- Sephadex Chromatography in Isolation of FSH- and LH-Releasing Factors 140

Congress Announcement

Corticosterone
- Competitive Binding with Fatty Acids during Pregnancy (rat) 184
- Metabolism of During Postnatal Life (rat) 304
- Plasma Albumin Binding for during Pregnancy (rat) 183
- Plasma Protein Binding and Metabolism of During Fetal and Postnatal Life 302
- Plasma Concentration, Clearance and Production of in Diabetics and Nondiabetics 253
- Unbound Rate of During Postnatal Life (rat) 302

Cortisol
- Plasma Concentration, Clearance and Production of in Diabetics and Nondiabetics 253
- In Vitro Transformation of 95
- Responses of to Hypoglycemia in Prediabetic Subjects 222

D

Dexamethason
- Radioimmunological Determination of FSH after Administration of 247
- Radioimmunological Determination of ICSH after Administration of 247

Diabetes
- Androgen Biosynthesis 74
- By Subtotal Pancreatectomy 72
- Effect of Aminophylline on the Insulin Response to Glucose Infusion in Prediabetic and Diabetic Subjects 162 Glybenclamid (HB 419) on Prediabetes (rat) 175
- Glucose Tolerance Test in Prediabetic Rats 176
- Induction of with Streptozotocin 290
- Insemination Capacity 73
- Insulin Releasing Mechanism and its Correlation to the Intracellular AMP Level 162
- Plasma Concentration, Clearance and Production of Cortisol and Corticosterone 253
- Positive Family History of 266
- Prediabetes by Subtotal Pancreatectomy (rat) 175
- Sexual Behaviour during Manifest Diabetes 73
- Sexual Behaviour during Prediabetic Stage (rat) 72
- Sexual Disturbances in the Male Rat 72
- Spontaneous Diabetes in Spiny Mice 45
- Testicular Pathology 73

Diaphragm
- Protein Metabolism in 282

Diazoxide
- Effect upon the Adrenergic System 296
- Effect on Blood Pressure and Inhibition by Propranolol 297
- Effect on Heart Rate and Inhibition by Propranolol 297
- Effect of Pancreozymin on Blood Sugar and Insulin after Treatment with 119
- Effect on Plasma Free Fatty Acids and Inhibition by Propranolol 296
- Effect on Plasma Free Fatty Acids and Reversion by Propranolol
- Effect of Secretin on Blood Sugar and Insulin after Treatment with 118
- Inducing Effect of on Insulin Secretion and Reversion by Phentolamine 298
- Inhibiting Effect on Glucose in Stimulating Insulin Release 116
- Inhibition of Insulin Secretion by 53
- Intracellular Digestion of Secretory Granules of β-Cells 58

– Metabolic and Circulatory Effects of 296
Dihydroergotamine
– Effect of on Growth Hormone 276

E
Embryology
– Alkaline Phosphatase activity in the pancreatic development of islets (rat) 18
– Presumptive islet cells with cholinesterase activity 12
Epimestrol
– Effect of Upon the Release of FSH and LH 310
– Ovulation-Inducing Effect of 312
Epinephrine
– Effect of Upon ^{45}Ca Uptake by Islets of Langerhans 319
– Responses of Urinary Epinephrine to Hypoglycemia in Prediabetic Subjects 222
Erythropoietin
– Chemical Properties 151
– Endocrine System and Erythropoiesis 153
– Site of Production 151

F
Fat Cells
– Correlation between Volume and Body Weight 83
– Determination of Lipolysis 82
– Effect of Intestinal Hormones upon Lipolysis of 249
– Enzyme Pattern 232
– Epinephrine Induced Lipolysis 82
– Isolated Human Fat Cells 81, 228
– Kinetic Konstants of LDH and Aldolase 231
– LDH Activity in 232
– Preparation of 229
– Preparation of 286
– Reesterification of Glycerol and Fatty Acids in Obese and Non-Obese Persons 85
– Soluble Proteins in 232
– Spontaneous and Epinephrine Induced Lipolysis 81
– Volume, Determination of 82
Fat Diet (rats)
– Effect on Insulin secretion 11
– Effect on sensitivity to Insulin 11
Fatty Acids
– Competitive Binding with Corticosterone during Pregnancy (rat) 184
– Increases in Plasmatic Level of After Admistration of γ-Guanidinobutyramide 263
– Plasma Albumin Bindung for during Pregnancy (rat) 183
– Reduction in after Administration of Growth Hormone 277
FSH
– Radioimmunological Determination of after Administration of Dexamethason 247
FSH-Releasing Factor
– Chemical and Physiological Properties 187
– Isolation from Human Anterior Pituitary Lobes 139
– Isolation from Pituitary and Pituitary Stalk 187

G
Glucagon
– Antybodies, Production of (rabbit) 87
– Effect of „Glucagon-Like Immunoreactive Material" on Adipose Tissue Metabolism (dog) 143
– Immunoreactive Content of (Fetal Rat Pancreas) 109
– Lipolytic Activity of in Fat Cells (rat) 317
– Potentiation of Glucose Induced Insulin Release by 168
– Secretion in Vitro 224
Glucose
– Assimilation in Prediabetic Subjects after Human Growth Hormone Administration 113
– Concentration
– – Influence on Insulin and Glucagon Release 226
– ^{14}C-Glucose 101
– Determination of the Assimilation Coefficient (K) 37
– Effects on Glucose Flux 101
– Effects of Growth Hormone on Oxidation of 293
– Enzymatically Determination with Hexokinase and G-6-PDH 175
– Exchangeable Glucose Mass 98
– Incorporation of into Lipids in Case of Total Lipodystrophy 195
– Increased Utilization Rate after Administration of γ-Guanidinobutyramide 259
– Inhibiting Effect of Diazoxide on Glucose in Stimulating Insulin Release 116
– Intravenous Glucose Tolerance Test in Positive History of Diabetes 268
– Isotope Dilution Studies of the Effect of Insulin and Diabetes on Glucose Transfer Rates 97
– Lactate-Glucose Transformation after Administration of Methyl-Prednisolon 181
– Oral Glucose Tolerance Test in Positive History of Diabetes 267
– Reversion of Diazoxide Induced Impaired Glucose Tolerance by Phentolamine 298
– Tolerance Test in Prediabetic Rats 176
– Tracer Methods in Glucose Kinetics 101
– Uptake During Rest and Exercise (Rat Hind Limb) 156
– Utilization Under Change in Blood Flow Rate (Rat Hind Limb) 158
Glybenclamid (HB 419)
– Effect on Prediabetes (rat) 175
Glycolysis
– Enzymes of in Fat Cells and Adipose Tissue 228
Gonadotropines
– Biological Effects 207
– Human FSH-LH-Releasingfactors 206
– Increasing of Gonadotropin Releasingfactor-Activity after Castration 207
– Increasing of Gonadotropin Releasingfactor-Activity after Ovariectomy and Hypophysectomy 208
– Isolation of FSH-Releasing and LH-Releasing Factors from Human Anterior Pituitary Lobes 139
– Releasingfactors
– – Stimulation of Gonadotropin Production 210
– – Stimulation of Gonadotropin Release 207
Growth Hormone
– Absorption to Kaoline 219
– Chronic Treatment with (rat) 65
– Concentration in Plasma
– – Following Electric Shock Therapy 5
– – Following Histalog Administration 5
– – Following Insulin-Induced Hypoglycemia 4
– – Following Surgical Stress 6
– – Following Vasopressin Administration 6
– Effect of Dihydroergotamine on 276
– Effects of on Glucose Oxidation 293
– Effect of on Metabolism of Adipose Tissue 290
– Effect of Moderate and High Doses in Prediabetic Subjects 111
– Enhancement of Glucose Uptake 30
– Generation of an Inhibiting Factor by Chronic Administration of 65
– Increasing of the Stimulating Effect of Muscle Extract in ^{35}S Incorporation 235
– Inhibition of growth hormone-insulin synergism 27
– Reduction in Plasma Free Fatty Acids by Injection of 277
– Responses of to Hypoglycemia in Prediabetic Subjects 222
– Separation of Free and Antibody-Bound Labelled Hormone by Kaoline in HGH Radioimmunoassay 218
– Treatment in rats 27
γ-Guanidinobutyramide
– Effects upon Blood Pressure 263
– Effect upon Blood Sugar Concentration 259

– Effects upon Hematocrit 263
– Effect upon Insulin Level 262
– Effects upon Plasmatic Free Acids 263
– Metabolic Effects of 259

H
Hematocrit
– Increases in after Administration of γ-Guanidinobutyramide 263
Hexosemonophosphat
– Shunt in Human Adipose Tissue and Fat Cells 232
Houssay Dogs
– Induced Lipolysis in 276
Hydroxyproline
– Excretion in Urine after ACTH-Administration 147
Hypoglycemia
– Effect on plasma ACTH concentrations 4
– Due to Non-Insulin-Producing Tumors 89
– Effect on plasma growth hormone concentrations 4
– Provokation by γ-Guanidinobutyramide 259
Hypophysectomy
– Effect of on Metabolism of Adipose Tissue 290
Hypothalamus
– Lipid Mobilizing Crude Fraction of 197

I
ICSH
– Radioimmunological Determination of after Administration of Dexamethason 247
Insulin
– Abnormal Pattern of in Pregnancy or Obesity 266
– Anti-Insulin Serum
– – Degranulation of B-cells by 53
– Anti-Insulin serum in the presence of incubated pancreatic tissue 10
– Blocking of Proinsulin-Insulin Conversion 256
– Competitive Antagonism between and its Analogues 315
– Decreased Stimulatory Effect of on Proline Transport 282
– Disappearance Rate of Exogenous Insulin in Prediabetic Subjects 221
– Determination of Free and Antibody-Bound Insulin 145
– Effect on Glucose Induced Release by D-Mannoheptulose, l-Leucin, l-Arginine and l-Lysine 172
– Effect on Glucose Induced Release by Pancreozymin 171
– Effect on Glucose Induced Release by Secretin 171
– Effect of 2-Hydroxy-5-Nitrobenzyl Bromide on Insulin Stimulated Protein Synthesis 321
– Effect of Secretin on Insulin Action 92
– Enhancement of Reactive Secretion by Cobalt-Chloride 44
– Fetal Insulin Concentration after Increasing of Maternal Insulin Level 274
– Impermeability of Human Placenta for 274
– Increases in Plasmatic Level of after Administration of γ-Guanidinobutyramide 262
– Impairment of insulin degradation by growth hormone 27
– Inhibition by chronic growth hormone administration 26
– Inhibition of growth hormone-insulin synergism 27
– Inhibition of Protein Synthesis in Presence of Tryptophan 284
– Inhibition of Secretion by Diazoxide 53
– Insensivity to in adipose tissue and muscle (rats) 9
– Isotope Dilution Studies of the Effect of Insulin on Glucose Transfer Rates 97
– Lack of Hypoglycemic Effect of Bovine Proinsulin in Partially Hepatectomized Rats 199
– Level during Pregnancy or Obesity 266
– Mammalian Insulin
– – Amino Acid Sequence 255
– Mammalian and Piscine Insulins Comparison of 255
– Maternal and Fetal Insulinemia (rat) 41
– Pancreatic Immunoreactive Insulin 45
– Piscine Insulin
– – Amino Acid Sequence 255
– Potentiation of Glucose Induced Release by Duodeno-Jejunal Mucosa 171
– Potentiation of Glucose Induced Release by Glucagon 171
– Response to Glucose Infusion in Prediabetic Subjects after Human Growth Hormone Administration 113
– Secretion of after Administration of Glucose and Diazoxide 116
– Secretion in Vitro Using Rabbit Pancreas 168
– Secretory response in obese rats 9
– Serum Immunoreactive Insuline (Spiny Mice) 45
– Reversion of Diazoxide Induced Inhibition of Insulin Secretion by Phentolamine 296
– Role of 3', 5'-Cyclic AMP Phosphodiesterase in Insulin Action on Rat Liver and Adipose Tissue 93
– Secretion of after Stimulation with Pancreozymin 224
– Secretion in Vitro 224
– Secretion Stimulation in Fetus by Maternal Glucose Infusion 274
– Sensivity of in Prediabetic Subjects 222
– Synergistic activity of growth hormone 26
Intestinal Hormones
– Insulin Release by 168
Iodine
– Deiodination of Tyhroxine by Erythrocytes and Leukocytes 242
Jodothyronines 241
– Seperation of HGH 218

L
Lactate
– Turnover and Conversion of after Administration of Methyl-Prednisolon 178
LH-Releasing Factor
– Isolation from Human Anterior Pituitary Lobes 139
– Isolation from Pituitary and Pituitary Stalk 187
Lipolysis
– Effect of Intestinal Hormones on 249
– Effect of Puromycine on 278
– Inducing by Dihydroergotamine 278
– Lipolytically Active Substance from Pituitary (β-LPH) 205
– Lipolytic Activity of l-Norepinephrine on Fat Cells 287
– Lipolytic Activity of Synthetic Glucagon in Fat Cells (rat) 317
– Lipolytic Hormone from Pituitary Extracts 286
– Stimulation by ACTH or TSH 279
Liver
– Enzyme Activity Before and During Prednisolone Therapy 90
– Hepatic Gluconeogenesis, Inhibition of 89
– The Role of 3', 5'-Cyclic AMP Phosphodiesterase in Insulin Action on (rat) 93

M
Mammalian Insulin 255
Methyl-Prednisolon
– Effect on the Turnover of Lactate and the Conversion of Lactate to Glucose (dog) 178
Mucopolysaccharidoses
– Heterozygous Carriers 78
– Classification and Identification 34
– Identified by Column Chromatography 79
– Identified by Thin Layer Chromatography 32
– Type Hunter 79
– Type Hurler 79
– Type Sanfilippo 79
– Urinary Acid Glycosaminglycans 79
Muscle
– Extract of as a Stimulator for S-Incorporation in Cartilage (chicken) 235

N
Neurotropic Stress 213
l–Norepinephrine
– Lipolytic Activity of 287

O
Obesity (in rats)
– Secretion of and sensitivity to Insulin 9

P
Pancreas
– A-Cells in the Endocrine Fetal Pancreas (rat) 108
– AMP Level in Pancreatic B-cells 162
– Congenital Hyperplasia of B-cells (Spiny Mice)
– Degranulation of B-cells by Anti-Insulin Serum 53
– Fetal Rat Pancreas 108
– Granulolysis of Secretory Granules of B-cells after Diazoxide Treatment 58
– Immunoreactive Glucagon Content in Fetal Rat Pancreas 110
– In Anencephalics 251
– Incubation of pieces of 9
– Intracellular Digestion of Secretory Granules of B-cells by Diazoxide 58
– Isolated Perfused Rat Pancreas 224
– Pancreatic Immunoreactive Insulin 45
– Pancreatic Islets
– – Cholinesterase activity in (chicken) 15
– Perifusion of (Spiny Mice) 47
– Subtotal Pancreatectomy 72
Pancreozymin
– Effect on Blood Sugar and Insulin before and after Treatment with Diazoxide 119
– Effect on Free Fatty Acids and Free Glycerol before and after Treatment with Diazoxide 119
– Glucagon Release after Stimulation with 224
– Insulin Secretion after Stimulation with 224
PBI (Plasma Protein-Bound Iodine)
– Level in toxic thyroid adenoma 20
Phenylalanine
– Stimulated Incorporation by Tryptophan 284
Pituitary Gland
– Lipolytic Activity of Crude Extracts 286
– Lipolytic Hormone
– – Extraction Procedure 202
– Isolation of FSH-Releasing and LH-Releasing Factors from Human Anterior Pituitary Lobes 139
– Isolation of a Lipolytic Active Hormone (hog) 202
Placenta
– Conversion of Dehydroepiandrosterone-Sulfate to Estrogens as a Test of Placental Function 96
– Impermeability of for Insulin 274
Prediabetes 221
Pregnancy
– Conversion of Dehydroepiandrosterone-Sulfate to Estrogens as a Test of Placental Function 96
– In Ectopic Adrenal Carcinoma 149
– Transcortin in Pregnancy and Lactation 130
– Unbound Corticosterone and its Role in the Initiation and Maintenance of Milk Secretion 133
Proline
– Transport and Uptake of in Presence of Insulin and Tryptophane 283
Puromycine
– Effect on Lipolysis of 278

R
Radioimmunoassay
– Measurement of ACTH in human plasma 3
– Measurement of growth hormone (HGH) in human plasma 3, 218
Radioisotopic Studies
– In toxic thyroid adenoma 21
Responses to Stress 1

S
Scintiscanning
– In diagnosis of toxic thyroid adenoma 21
Secretin
– Effect on Free Fatty Acids and Free Glycerol before and after Treatment with Diazoxide 118
– Effect on Blood Sugar and Insulin before and after Treatment with Diazoxide 118
– Insulin Stimulating Action of 91
Spiny Mouse
– Metabolic State and Pancreatic Insulin Release in Vitro 45
Stilboestrol
– Effect of Upon Pituitary LH and Hypothalamic LH-RF 311
– Effect of Upon the Release of FSH and LH 311
Stress
– Pituitary-Adrenal Response to 305
– Stimulation of growth hormone secretion
– Stimulation of ACTH secretion 1-6
– – of HGH (STH) Secretion 1
Sulfonylureas
– Influence on the Islet Cell System 175
Sulphur
– Sulphate Incorporation into Embryonic Chick Cartilage 235

T
Thin Layer Chromatography
– Of Urinary Acid Glycosaminoglycans 32
Testosterone
– Metabolism in the Isolated Perfused Human Foetal Liver 43
Thyroid
– Redox Ratio of Blood Metabolites and their Correlation to Hypo- and Hyperthyroidism 127
– Toxic Adenoma
– – Diagnosis of 21
– – Treatment of 21
– Carbohydrate and Fatty Acid Metabolism and its Correlation to Thyroid Activity 123
– Lactate-Pyruvate Ratio in Diagnosis and Therapy of Hypothyroidism 127
– Metabolites in Blood and their Correlation to Hypo- and Hyperthyroidism 125
Thyrotrophin (TSH)
– Effect on Lipolysis of 276
Thyroxine
– Deiodination of by Erythrocytes and Leucocytes 241
– Deiodination of in Euthyroidism 242
– Deiodination of in Hyperthyreoidism 242
– Enhancing of Transcortine Binding During Postnatal Life (rat) 304
– Metabolism of 241
Transcortine
– In Pregnancy 130
– In Fetus and Infant 301
– Synthesis During Postnatal Life (rat) 301
– Synthesis in Pregnancy 129
Tryptophan
– Effect upon Insulin on Proline Transport 283
– Incorporation of Phenylalanine by 284
– Inhibition of Protein Synthesis in Presence of Insulin 284
TSH (Thyroid Stimulating Hormone)
– Exogenous administration in diagnosis of toxic thyroid adenoma 21
